The ultimate
interactive
portable
companion.

Flow

An altered state of consciousness in which the mind functions at its peak, time may seem distorted, and a sense of happiness prevails.

In such a state the individual feels truly alive and fully attentive to what is being done.

This state is distinguished from strained attention, in which the person forces themselves to perform a task in which he has little interest.

Medical Dictionary © 2009 Farlex and Partners

espresso helps you, and people like you, find focus and achieve flow state, anywhere.

Product specifications

espresso Display

The world's thinnest and most interactive portable displays. espresso Displays seamlessly blend cutting-edge technology with sleek and minimalist design.

espresso Displays are a fusion of slim form factor and intuitive touch functions, providing creative professionals, and high performers an unprecedented level of on-the-go productivity.
